

Important Flu Facts

All people 6 months of age and older should get vaccinated against seasonal flu every year.

Children younger than 6 months are at high risk of serious flu illness but are too young to be vaccinated. People who care for them should be vaccinated instead.

Vaccination is especially important for pregnant women and people with chronic diseases.

The flu vaccine protects against several different flu viruses (strains). Flu vaccines are updated every year to better match the viruses circulating in the public.

Getting the flu vaccine cannot give you the flu! The vaccine is made with inactive (killed) virus strains which are not infectious.

For additional information please visit our website at www.ochd.org or download a vaccine information statement at CDC.Gov/Vaccines/hcp/vis

Protect yourself from Respiratory illness.

- Cover your mouth and nose with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it.
- Consider wearing a facial covering when necessary.
- Wash your hands often with soap and water or use an alcohol-based hand rub.
- Avoid close contact with people who are sick.
- Stay home when you are sick.
- Avoid touching your eyes, nose, or mouth.
